Features:

King's PVC Safety Boots are engineered to provide waterproof protection and slip resistance for workers in wet and muddy environments. Built for durability and all-day comfort, this high-cut boot range delivers essential industrial protection while keeping wearers dry and sure-footed on the job.

- Injection-moulded PVC body blocks out water and sludge to keep feet dry.
- Carbon steel toe-cap absorbs heavy impacts and compression hazards.
- Midsole insert to protect against sharp underfoot objects.
- Slip-resistant, oil-resistant and shock-absorbing to ensure steady footing.
- Anti-static; Compliant with EN ISO 20345:2022 standards.
